

I am writing to be certain that you are aware that K-Love serves a vital roll in our local community. There are three key functions K-Love provides that are not available anywhere else in this area.

1) Klove provides a local events calendar that is not available on other stations. Local events here in the South San Jose, Morgan Hill area would not be carried by the big San Francisco radio stations.

2) They provide a non-threatening child-healty listening environement 24 hours a day 7 days a week. There is not vulgar talk, not violence, not inuendo and double meanings. It is good clean talk at all times. I can't say that about any other stations in the area.

3) The music provided is equally positive and provides my children with the a positive alternative not available anywhere else on the local radio.

I can not imagine what the impact would be on me and my family if you were to designate the frequencies alocated currently to K-Love to an LPFM broadcaster. However, I can tell you this without question: A ruling by the FCC that causes us to loose KLove would be one of the worst decisions the FCC could make. You would be sending a clear message to me, my family and this community that while you want the airwaves to serve the community; you only want them served in some narrow view or interpretation of "serve".

So in case I have not been clear: Am I being served in the public interest by K-Love. YES! Absolutly.

Please don't take that right away from me and the others here that appreciate the service KLove provides.

Respectfully,
James Szmak
